

THINK SUPER!

INTRODUCING THE SUPER-O

THE ONE TOOL that is capable of slicing through the toughest materials... **Plastic, Wood, Aluminum, Solid Surface**

The highly polished open flute not only allows for easier chip formation and evacuation, but also provides for a sharper cutting edge that delivers a better edge finish on a variety of materials. Our premium micro grain carbide allows for superb wear resistance and tool strength. Special point geometry contributes to improved bottom finish and plunging capabilities. Tools are available in upcut and downcut versions from 1/16" through 3/8" diameters.

65-000 – Single Edge, Solid Carbide
Upcut Spiral O Flute
Plastic, Wood, Aluminum & Solid Surface
